WILLY-WILLY

ECONOMY & ECOLOGY
ECONOMY & ECOLOGY

FOR A VERY EFFICIENT, FAST, ECONOMIC AND ECOLOGIC DRYING...

■ FAST & EFFICIENT

The double air injection speed will dry your hand in a very short time. Insert your hand in the drying zone and pull it out slowly. Due to the air injection system, drying is very efficient and comfortable.

Power and speed of injected air will dry your hands in less than 10 seconds.

■ ECONOMIC & ECOLOGIC

Due to very fast drying and with an immediate stop of the engine when hands are out the new generation hand dryer Willy-Willy reduce dramatically the electrical consumption compare with classic hand dryer.

The very low electrical consumption of the Willy-Willy allow to spare money compare with other drying system (paper, towel, ...) and classic hand dryer.

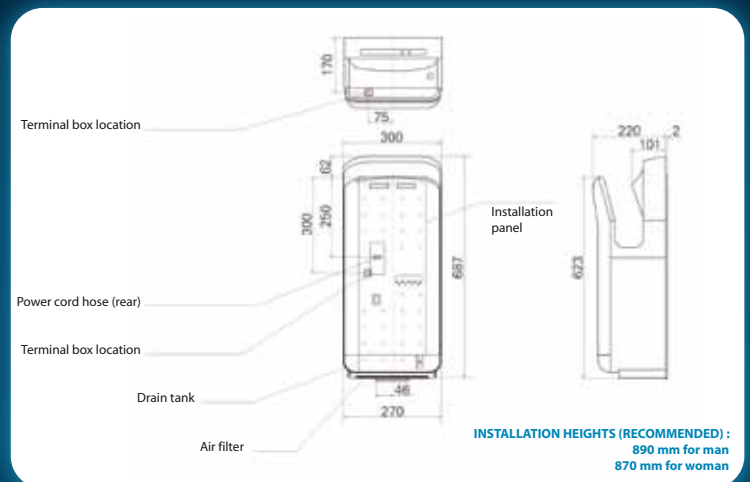

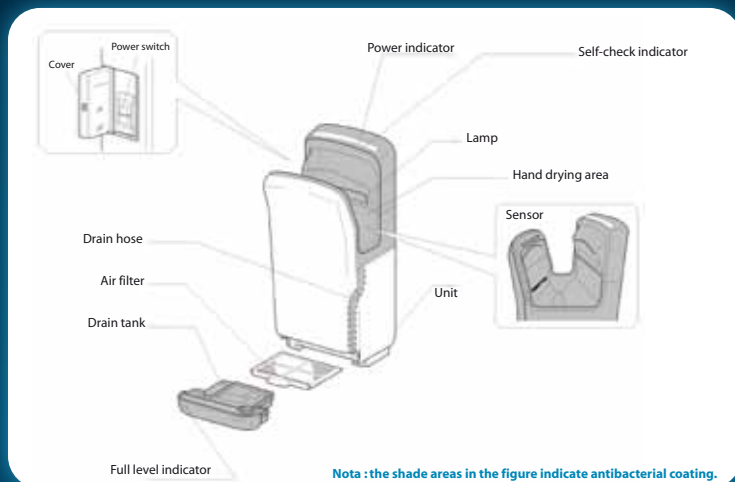

Choosing new generation hand dryer Willy-Willy allows to reduce paper waste, water and detergent to clean towel, high level of electrical consumption of classic hand dryer. Choosing new generation hand dryer Willy-Willy is participating to environmental safety.

■ HYGIENIC & DESIGN

The innovative design of the new generation hand dryer Willy-Willy will be very pleasant in every restroom, from the more traditional to the most innovative.

The drying area and all parts in potential contact with hands are anti bacterial.

The water that comes from drying will be directed through a special water tank. No more water below your hand dryer.

Model	Air speed	Technical data	Power	Weight	Dimensions
Willy-Willy	324 km/h	220V-240V – 50 Hz - 8A	650 W	11 Kg	300 x 220 x 687 mm
